Tel: 0723 971 130

- We specialize in the custom fabrication and modification of vehicle bodies, delivering durable and high-quality solutions for all types of motor vehicles and trucks. Whether you need bodywork for commercial fleets, custom builds, or heavy-duty trucks, DOUBLE "7" BODIES FABRICATION is your trusted partner in precision, strength, and craftsmanship.

METAL

cutting, shaping, welding, and assembling thick, large pieces of metal (such as steel, iron, or aluminum) to create heavy-duty structure components.

Our services include:

- Spray painting and protective coating to prevent corrosion.
- Polishing and detailing for professional aesthetics.
- Sealing and lining for water, fuel, and cargo protection.
- Custom finishes to match client branding and specifications.

KEY PROCESSES IN HEAVY METAL FABRICATION:

- Cutting (plasma, laser, oxy-fuel, waterjet)
- Bending & forming (press brakes, rolling machines)
- Welding & joining (arc welding, MIG, TIG, submerged arc)
- Machining & finishing (drilling, grinding, painting, galvanizing)
